## C# Developer Full-time

As a C# Developer at DocCentrics, you will be responsible for the technical execution and enhancement of our suite of software products.

As part of the Development team, you will have a seat at the table from day one, collaborating closely with fellow developers, analysts, designers and clients throughout a range of exciting projects.

---

### About you

You're a techy, through and through. You know your stuff and have been around the block enough times to know that your code probably won't work first time round - and that it's perfectly normal.

You're up to speed on best practices, know the lingo and are a logically minded person who works well with others. Developers look to you for help and even if you don't have the answers, you figure it out together.

Designers and Analysts love working with you because you understand that collectively you'll create better solutions. And clients celebrate you as the Khaleesi of code, solver of problems, eliminator of their business woes.

If you prefer , that's cool. Here's what we're looking for:

#### Experience wise:

- 3 years experience as a Developer
- A bachelor's degree (or equivalent) in Computer Science

#### Knowledge & skills wise:

- .NET framework (C#, ASP.NET, MVC)
- HTML, CSS, JavaScript, XML, JSON
- Any knowledge of MySQL, Ruby, MongoDB, Powershell or Web API's would be great but isn't essential
- Good knowledge of Agile, Lean, Object Oriented Design (OOD), Test Driven Development (TDD) and Extreme Programming
- Creative, logical problem solver

#### Team wise:

- Keen collaborator, sharer of knowledge and team player
- Strong interpersonal and communication skills
- Generally just a decent human being

# DocCentrics

## About the role

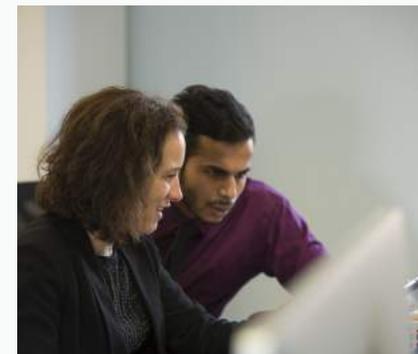

As C# Developer at DocCentrics you will work within a culture where communication and teamwork are favoured over hierarchical structure - so yes, it's okay to talk to our CEO Simon (he's pretty friendly).

You'll be working within an agile environment on a range of internal and client projects that will require flawless execution and a delivery as smooth as B.B. King's voice.

You'll be involved in research, planning, enhancing and shaping our technical strategy from the outset so please - let us hear your ideas.

**If you like checklist, you probably like a good <ul> too huh?  
Here's what you'll be doing:**

- Working within an agile development environment
- Enhancing our existing suite of software products
- Defining the architecture and technical solutions for our clients requirements
- Researching, developing and testing new functionality
- Implementing user interface updates and enhancements
- Estimating and planning projects
- Writing technical documentation
- Solving problems as a team

# DocCentrics

## About us

We are a software company. Plain and simple. Our pièce de résistance is the ability to extract data from systems, plug it into our suite of software products, which then produces (and sends) personalised customer communications.

We're constantly pioneering new and innovative ways to transform traditional communications into experiences. This includes (but is never limited to) SMS, emails, chat bots, apps and websites.

---

## What you really want to know. Salary & Benefits

- Competitive salary
- Annual salary review
- Clear objectives and training
- Company bonus scheme (if we do well, so do you!)
- Relaxed working environment and flexi-time
- Cycle to work scheme
- £150.00 towards an e-reader or e-books
- Regular team lunches (nom nom!)

## Sound good? Applying is easy

If this sounds like your cup of tea, you know what to do. Simply send us your CV and some words to [careers@doccentrics.com](mailto:careers@doccentrics.com)

We'll be in touch.
