

DocCentrics

Apprentice Developer Stevenage

As an Apprentice Developer at DocCentrics, you will be responsible for assisting our team of developers in the creation and enhancement of our software products.

As part of the Development team, you'll be collaborating closely with both developers and designers on a range of exciting projects.

About you

You're a techy through and through. Hopelessly devoted to technology and have a serious hankering for learning new skills.

You're thinking of embarking on a career in development. Maybe you know exactly where you're going, maybe you don't. And that's okay.

You might also have something cool with your name on it, like some A-Level certificates or a BTEC qualification. But if you don't - no sweat! Show us what you've got instead. What's important is that you're a good egg looking to learn and happy to share your ideas.

**If you prefer checklists, that's cool.
Here's what we're after:**

Experience wise (any of the following are good with us):

- A-Levels or BTEC in IT or Computer Science
- Personal projects (must be demonstrable)
- No experience or qualifications what so ever

Knowledge & skills wise:

- Knowledge of any development languages including (but never limited to) HTML, CSS, JavaScript, PHP or C#
- Basic understanding of Agile and Lean Development methodologies (just read up about it)
- Impressive problem solving skills
- Seriously good attention to detail

Team wise:

- Keen collaborator and team player
- Sharer of knowledge
- Generally just a decent human being

DocCentrics

About the role

As an Apprentice Developer at DocCentrics you will work within a culture where communication and teamwork are favoured over hierarchical structure - so yes, it's okay to talk to our CEO Simon (he's pretty friendly).

You'll become a part of our development team, learning and assisting them with new projects, user interface enhancements, testing and generally just making our suite of products better for our clients.

**If you like checklists, you probably like bullet lists too, huh?
Here's what you'll be doing and learning:**

- Assisting with internal and client projects
- Researching, developing and testing new functionality
- Fixing pesky bugs
- Implementing user interface updates and enhancements
- Technical documentation
- Agile and Lean development methodologies
- Assisting with the estimation and planning of projects
- Solving problems and developing solutions as a team

DocCentrics

About us

We are a software company. Plain and simple. Our pièce de résistance is the ability to extract data from systems, plug it into our suite of software products, which then produces (and sends) personalised customer communications.

We're constantly pioneering new and innovative ways to transform traditional communications into experiences. This includes (but is never limited to) SMS, emails, chat bots, apps and websites.

What you really want to know. Salary & Benefits

- £15,000 - £18,000 annual salary
- 2 year apprenticeship
- Clear objectives, training and career progression
- Company bonus scheme (if we do well, so do you!)
- Relaxed working environment and flexi-time
- Cycle to work scheme
- £150.00 towards an e-reader or e-books
- Regular team lunches (nom nom!)

Sound good? Applying is easy

If this sounds like your cup of tea, you know what to do. Simply send us your CV and some words to careers@doccentrics.com

We'll be in touch.

A few things to note:

DocCentrics is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all our employees.

Candidates must have the right to work in the UK.
